

SunWize SW100C

SunWize®

SW Series Solar Modules

SunWize Solar Modules deliver top-quality performance for all photovoltaic applications including rural electrification, water pumping, telemetry, communications, and general battery charging. SunWize modules can be used in single-module and multiple-module installations. Each module consists of 36 solar cells connected in series (except the SW90C which is 48 cells in series), providing maximum charging power.

Features include:

- The glass surface is impact resistant and allows maximum light transmission
- Single crystalline solar cells are encapsulated and bonded to the glass in multiple layers of ethylene vinyl acetate (EVA) and laminated with a white Tedlar™ backing insuring long life in severe environmental conditions
- A weather resistant junction box accommodates all wiring methods including moisture-tight strain relief connectors and electrical conduit. Bypass diodes insure reliable operation
- Anodized aluminum tubular frames add strength and durability to the modules with pre-drilled mounting holes
- UL listed to UL-1703 and cUL listed (except SW90C), FM approved for hazardous locations Class 1 Div. 2 (except SW90C), and ISpra certified to IEC61215. All SunWize modules carry a limited 25-year, 80% power output warranty
