SUNWIZE TECHNOLOGIES CELEBRATES TEN YEAR ANNIVERSARY
The company marks a decade of providing solar power solutions to
customers in North and South America

Kingston, New York, June 18, 2003 - SunWize Technologies is proud to announce their ten year anniversary in the solar industry. The company was incorporated in New York State in 1993 as a distributor of solar modules and balance of system components. Today, SunWize also specializes in developing and manufacturing solar power systems and custom-engineered modules for integrating solar into OEM battery-operated products. The SunWize branded line of products includes the SunWize® PowerPort, Power Ready System, Power Station, Portable Energy System, SW solar modules and Solar Connect® residential grid-tied systems.

David Kulik, president, stated, "SunWize has grown substantially in ten years and now employs 55 people including some of the industry's most experienced sales, marketing and engineering talent." The company is a leading U.S. PV systems integration firm and is one of the largest solar equipment suppliers on the GSA schedule. SunWize also works with an extensive dealer network throughout North and South America.

In 2000, SunWize received a Pioneer in Excellence award from the New York State Energy Research and Development Authority (NYSERDA). The award is given in recognition of successful partnership with NYSERDA and excellence in energy innovation in the public interest for the State of New York. Peter R. Smith, acting president of NYSERDA, commented, "NYSERDA is pleased that our partnership with SunWize has helped a New York company become a leader in photovoltaics. Their early efforts and continued growth are working examples of Governor Pataki's vision that we can spur economic growth, while improving our environment. We look forward to SunWize's continued growth in serving the global solar market from right here in the Hudson Valley."

SunWize operates a 30,000-sq. ft. manufacturing/distribution facility in Kingston, NY, a distribution center in Oxnard, CA and eleven sales offices nationwide. A comprehensive research and development laboratory in the NY plant facilitates new product development. "The company's rapid growth in its first decade of business is clearly the result of an extremely capable and dedicated group of employees serving a vibrant industry with unlimited potential. We are very excited about the next ten years," commented Bruce Gould, vice president of sales.

SunWize Technologies, a solar technology company, specializes in the design and manufacture of integrated solar power systems, and associated project development and product distribution.
