

PRESS RELEASE

**AvaLAN Wireless Partners with SunWize and MOBOTIX to
Deliver a Complete Wireless Surveillance Solution for Remote Areas**

PALO ALTO, Calif., March 15, 2007—AvaLAN Wireless, an innovator in the wireless Ethernet market, has partnered with SunWize Technologies, a manufacturer of solar power systems, and MOBOTIX, a manufacturer of IP-based digital video surveillance cameras, to deliver a complete wireless surveillance solution that can be deployed in remote areas.

This marks the first partnership of its kind for the three companies. Together they are able to offer the market custom-built solutions configured to meet each client's power needs. The system includes a wireless Ethernet system from AvaLAN Wireless, a solar power source from SunWize Technologies, built according to the system's power requirements, and an IP-based surveillance camera from MOBOTIX.

“This partnership between AvaLAN Wireless, SunWize and MOBOTIX is revolutionary since it provides the security market with an all-in-one wireless IP-security solution with a built-in solar power supply,” said Ray Shilling, vice president of sales and marketing for AvaLAN Wireless. “Since our radios only consume 1 watt of power; and the MOBOTIX cameras only 3.5 watts, this results in the smallest solar panel requirement in the industry – thereby saving the customer money”

To determine load requirement for systems, customers can visit AvaLAN Wireless' or SunWize's specifier section of the web site to provide daily equipment load, voltage requirements and design the ideal system for the geographic location of the system.

“We are proud to partner with AvaLAN and MOBOTIX to bring security systems to remote locations,” said Mark Wilkerson, VP of Business Development for SunWize. “SunWize solar energy systems provide reliable and continuous power for AvaLAN's wireless Ethernet bridge and the MOBOTIX camera. These products are unique in their combination of low power requirements and high performance which lend themselves perfectly to the SunWize remote power solution.”

“The combination of MOBOTIX, AvaLAN and SunWize creates several unique synergy effects,” said Wolfgang Ritter, US Sales Director for MOBOTIX. “Superior image quality, excellent network performance and a very reliable power source make this an extremely attractive trio for deployment in remote areas. In addition, we are pleased to be part of the movement toward clean, renewable energy sources.”

AvaLAN Wireless Systems, Inc.

AvaLAN Wireless Systems, Inc. is a specialist in the long range Wireless Ethernet market. It offers both non line-of-sight 900 MHz and line-of-site 5.8 GHz wireless Ethernet bridge products. AvaLAN's solutions offer affordable Ethernet connectivity at the network's edge. With both

indoor and outdoor models available, and a full line of specialty 900 MHz and 5.8 GHz antennae, AvaLAN provides its customers with a way to replace costly wiring with a wireless Ethernet bridge that can remotely enable surveillance cameras, digital signage, bio/finger print readers, access control devices, remote printers, industrial networking and internet kiosks. AvaLAN's products offer the ideal combination of price, data rate, security, interference avoidance, quality-of-service and ease-of-use that professional installers and consumers are demanding.

AvaLAN Wireless Systems Inc. is headquartered in Palo Alto, California and can be contacted at 866-533-6216, by email at info@avalanwireless.com, or by visiting www.avalanwireless.com.

Mobotix AG Company Profile:

Mobotix develops and manufactures IP network cameras for user-friendly video surveillance and web cam solutions for IP networks. With all features integrated in the camera, no additional software installation is required. Mobotix, founded in 1999, is privately held with global headquarters in Kaiserslautern, Germany. More information can found at www.mobotix.com

SunWize Technologies

SunWize Technologies, a solar technology company, specializes in the design and manufacture of integrated solar power systems, and associated project development and product distribution The Company operates a manufacturing/distribution facility in Kingston, NY and a distribution center in Oxnard, CA. www.sunwize.com.
