**SunWize Completes 15 kW System at Kingston, NY Headquarters**

Six systems are part of a demonstration program conducted by SunWize engineers.

**Kingston, NY, January 23, 2006** - SunWize Technologies announces completion of six grid connected solar power systems, with a total rated power output of 15kW, at the company's headquarters in Kingston, NY. The project was supported by funding from the New York State Energy Research and Development Authority (NYSERDA). Five systems are mounted on the roof of the company's headquarters facility. The sixth system is a ground mounted SunWize® Power Station. All systems are part of a demonstration program allowing SunWize engineers to compare system performance. John Foster, SunWize System Design Engineer, stated, "The combined systems provide approximately 18,000 kWh per year of energy. The energy production of the systems represents almost 5% of the total annual facility usage."

The five roof mounted systems are SunWize Grid Tie Systems (GTS) installed on the building's standing seam roof. GTS's are designed for residential and commercial grid connected power applications. Each system uses a different type and size of solar module, either SunWize, Sharp, Sanyo or Uni-Solar with SMA inverters. The systems are configured to permit the installation of different inverters for future testing and evaluation.

The ground mounted SunWize AC Power Station is also connected with the utility grid. This system includes battery storage to provide backup power to the facility's critical loads including the telephone network, emergency lights and computer servers in the event of a power outage. SunWize Power Stations are typically used for off-grid applications in industrial markets.

**About SunWize**

SunWize Technologies, a solar technology company, specializes in the design and manufacture of integrated solar power systems, and associated project development and product distribution. The company operates a manufacturing/distribution facility in Kingston, NY and a distribution center in Oxnard, CA. [www.sunwize.com](http://www.sunwize.com)
