**SunWize® SW and OEM Solar Modules Receive FM Approval**  
Competitively priced solar modules offer 20-year warranty

**Kingston, New York, August 23, 2002** –SunWize Technologies, Inc. is proud to announce that their SW and OEM line of single crystalline modules received FM approval for Class I, Division 2, Groups A, B, C, and D, Hazardous(Classified) Locations. The SunWize solar module line ranges from 5 to 120 watts and are rated at +/- 5% of the listed output. All SW and OEM series modules come with a 20-year, 80% power output warranty. Accessories include SunWize mounting hardware, interconnects and the SWIL4 voltage regulator, all sold separately or in module kits.

Bruce Gould, VP Sales, commented, "The FM approval opens up the SW and OEM module lines to numerous Class I, Division 2 applications. These modules are competitively priced with very tight power rating tolerances and an exceptional warranty." They now are an integral part of our line of solar power solutions for the oil and gas industry."

SunWize high quality modules include an impact resistant glass front, Tedlar® back, EVA encapsulate, anodized aluminum tubular frame with pre-drilled mounting holes, and blocking diodes contained within a weather-resistant junction box. The SWIL4 voltage regulator, for systems rated up to 55 watts, is fully encapsulated, making it intrinsically safe for Class 1, Division 2 environments. The entire SW and OEM lines are in stock at both SunWize distribution centers in New York and California.

SunWize Technologies, Inc., a solar technology company, specializes in the design and manufacture of integrated solar power systems, and associated project development and product distribution.
