**SunWize<sup>®</sup> SW Solar Modules Receive UL Approval**  
Competitively priced solar modules offer 20-year warranty

**Kingston, New York, May 29, 2003** – SunWize Technologies recently received UL listing for their SW line of single crystalline solar modules. The SunWize solar module line ranges from 85 to 120 watts and is rated at +/- 5% of the listed output. All SW series modules come with a 20-year, 80% power output warranty. Accessories include SunWize mounting hardware, interconnects and the SWIL6 voltage regulator, available separately or in module kits.

“We are proud to offer an economically priced solar module that allows our customers to successfully compete in the residential grid tie marketplace”, commented Joanne Smith, VP Residential Power. She added, “These modules exceed industry standards providing exceptional reliability and maximum power output.”

SunWize high quality modules include an impact resistant glass front, Tedlar<sup>®</sup> back, EVA encapsulate, anodized aluminum tubular frame with pre-drilled mounting holes, and blocking diodes contained within a weather-resistant junction box. The SWIL6 voltage regulator, for systems rated up to 100 watts, is fully encapsulated. The SW85 and SW90 UL listed modules are in stock at both SunWize distribution centers in New York and California. The SW100, SW115 and the SW120 UL listed modules will be available in July.

SunWize Technologies, a solar technology company, specializes in the design and manufacture of integrated solar power systems, and associated project development and product distribution. The company operates a manufacturing/distribution facility in Kingston, NY and a distribution center in Oxnard, CA. For more product and pricing information, call 800-817-6527.
